## – the next step in transporting

An electrical driven **BELTLESS CONVEYOR** that solves scrap & parts removal problems efficiently and inexpensively with a linear, rhythmic tray motion. No air, no maintenance, no replacement costs of belts & rollers as with conventional conveyors. Just install the low profile Transporter under your tool and problems with slugs, steel shavings, and scrap disappear. One transporter can drive multiple trays. The Transporter can also be used in assembly-type operations.

Max Load Capacity	100 kg
Max Tray Weight	35 kg
Stroke Length	16 mm
Feed Rate	8-10 m/min
Initiator	Yes
Sound Level	62 dB (A)
Motor Effect	0,5 Kw
Electrical Con.	380-415V 50-60Hz alt. 110-120V
Shipping Weight	31 kg
